PROFILE

Computer Science student with a passion for well designed software experiences.

EXPERIENCE

Google, Software Engineer - May 2013 - present – Mountain View, CA
iOS developer on Core Search. Working on Google Now and search on iOS.

Path, Software Engineer Intern - Summer 2012 – San Francisco, CA
Built various server, web, and iOS features and tools; including real time data visualizations and deeper integration with various third party services.

Inklings, Software Engineer Intern - Summer 2011 – San Francisco, CA
Developed a web store from beginning to end making extensive use of Django, Javascript, and SCSS. Prototyped application interaction flow for an upcoming product.

RCLConcepts, LLC, Founder - 2007 - present
Founded as a high school student, I developed websites for local business. Today the company umbrellas my independent web and iOS applications:

TimeTable (<http://timetableapp.com>)
BugHub (<http://bughubapp.com>)

Cappuccino, Core Team Member – 2010 - present
Core team member of the open source Cappuccino project. Maintain various parts of the open source project and developed a nearly complete port of Cocoa's NSTableView. Cappuccino is an open source Javascript framework for building rich desktop-class web applications.
<https://github.com/cappuccino/cappuccino>

Primary developer and maintainer of Issues, an open source Cappuccino front end to Github's issue tracking system. Listed as a featured app the Google Chrome Web Store as well as the Chromium blog.
<http://githubissues.herokuapp.com>

National Weather Service, Paducah, KY, Volunteer - Summer 2008 and Summer 2009
Developed systems information monitor software to track the operational status of equipment around the region, currently being used in several offices around the nation.

SKILLS
